

INFO 6210 MySQL Installation (Windows)

* MySQL 5.7 (community version)

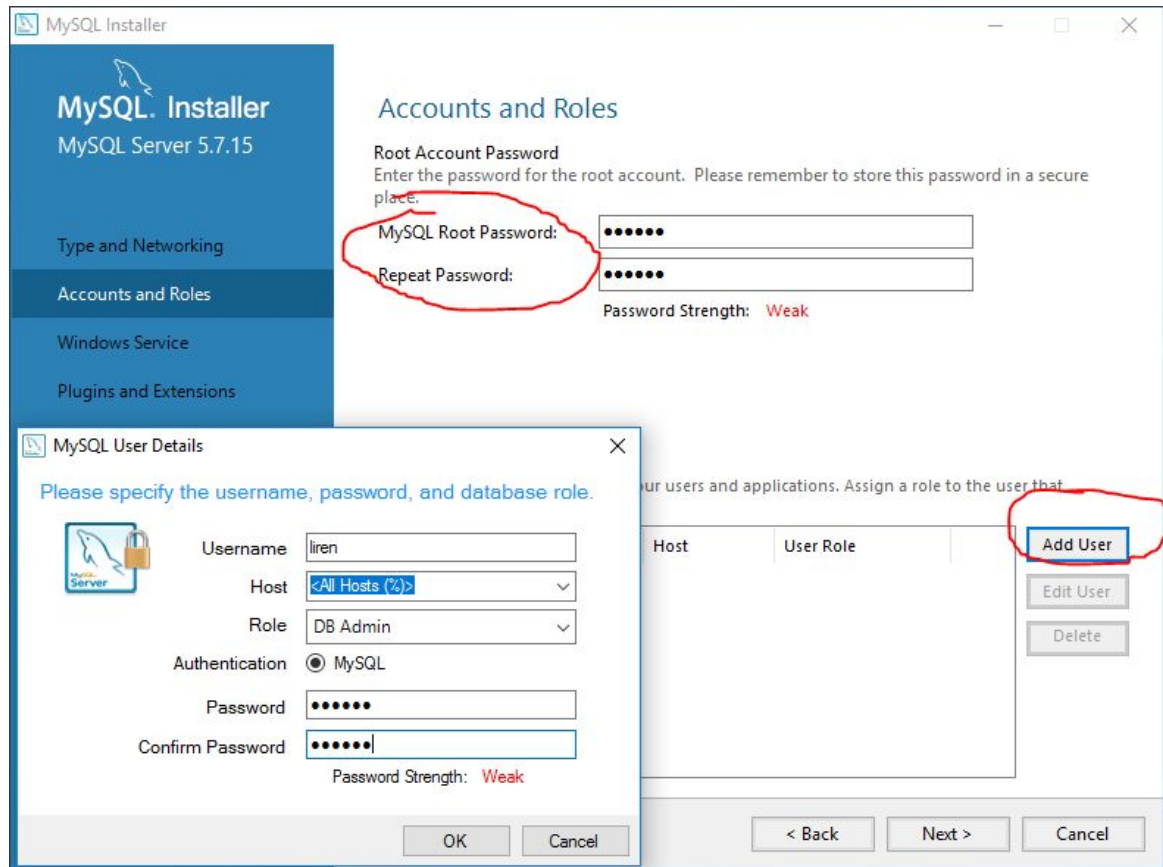

<http://dev.mysql.com/downloads/windows/installer/>

Filename: mysql-installer-community-5.7.15.0.msi

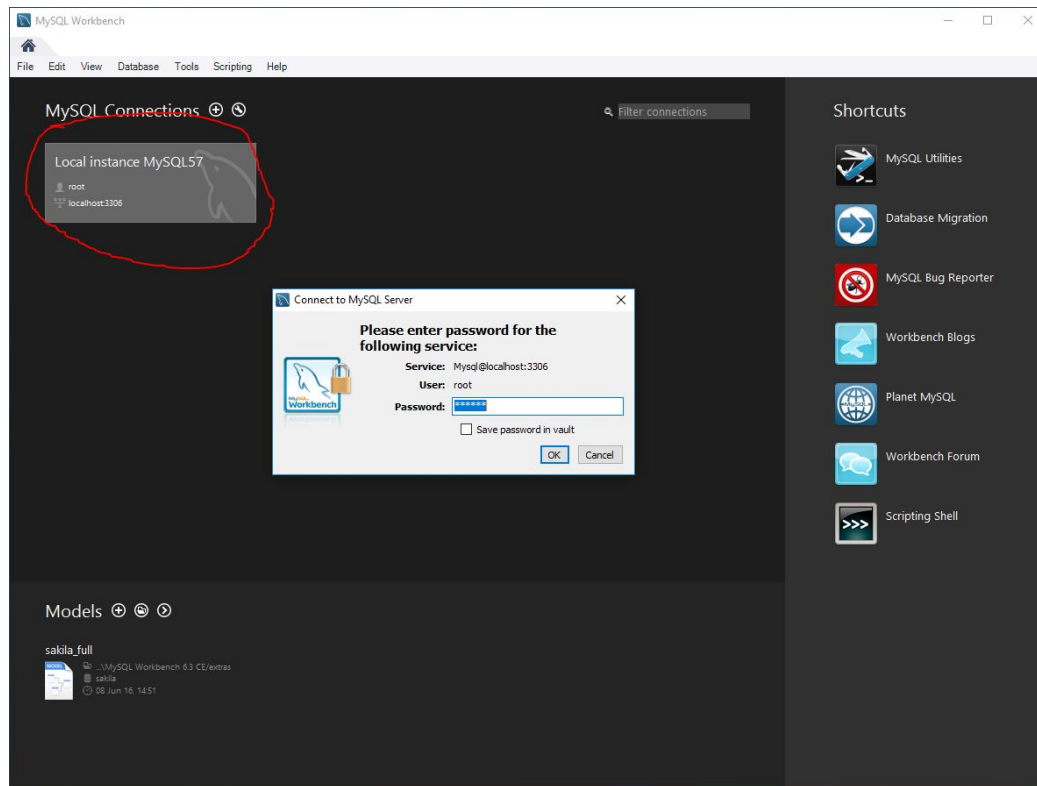

1. Select Developer Default. Then click Next until step 2.

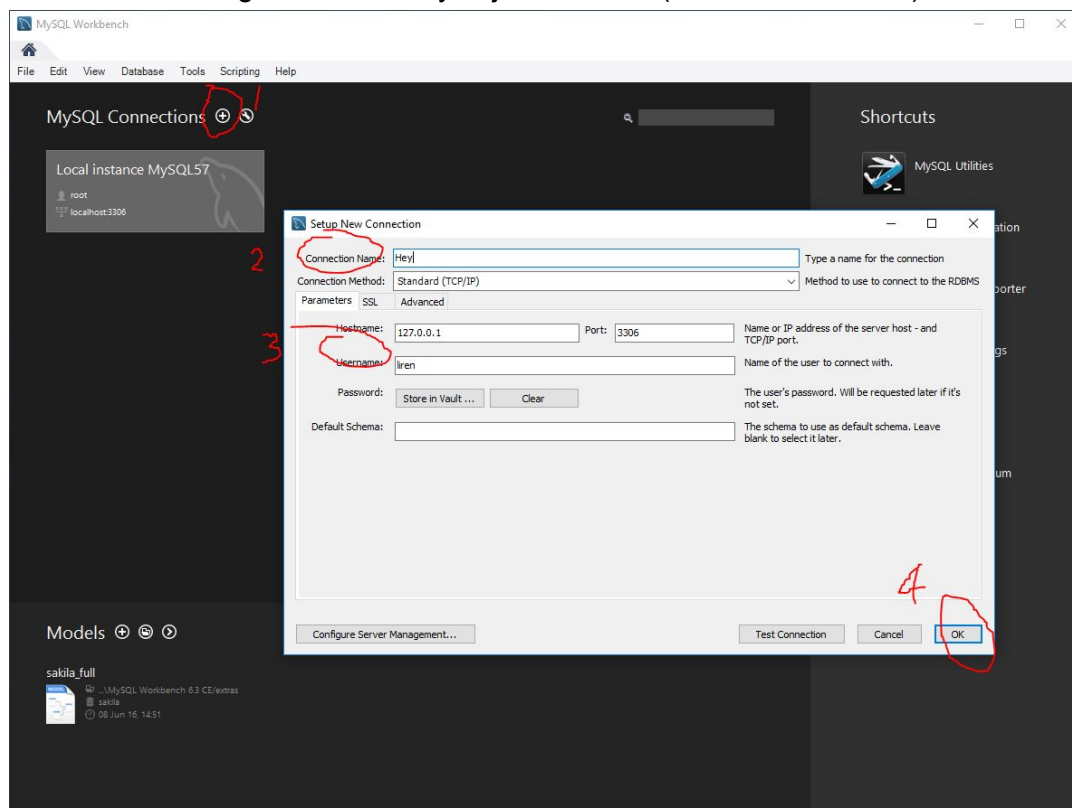

2. Set the root password and create a new user. Click Next until the installation is finished.

3. Run "MySQL Workbench", and login as "root" user.

4. You can also login as the user you just created. (click the "+" button)

-----Done!-----
