# Communication for Engineers

Program Overview

# What is “Communication for Engineers”?

- Graduate level course designed specifically for graduate engineering students
- Developed based on feedback from previous students and employers
- Designed to help students be more competitive candidates in their job searches
- Goal is to improve students' confidence and communication skills in the context of the US workforce

# How will this help me?

- Just like ENCP 6000, this “Communication for Engineers” course will meet once a week
- Each week will focus on a different aspect of English usage in the workplace
- Some weeks will focus on the mechanics of English language (such as sounds, rhythm, intonation)
- Some weeks will focus on sociolinguistic aspects of English (such as appropriate “small talk” at work, different idioms or expressions in American English, what to expect during interviews or meetings in the US workplace)

# Logistics

- Classes start **January 17** and end **April 17**
- Time: **Fridays 11:35am-1:25pm**
- Location **WV H 11**
- No registration needed
- No tuition fees – this course is **free** to all students who have been nominated to join the program!  
**Congratulations!**

# Sounds great! What next?

Interested? Excited? Ready to join the Communication for Engineers Spring 2020 program and improve your chances of landing a co-op?
